

# IELTS READING SAMPLE TEST WITH ANSWER

## TEST 1

### True / False / Not Given tasks

Learners of English at all levels of proficiency are familiar with reading and listening tasks that ask them to decide if statements about the text are true or false. In the [IELTS Reading test](#), this task type is given a twist: instead of two options (True or False), there are three: True, False or Not Given. In particular, it appears to be the identification of this third option, Not Given, that many candidates consider to be a real challenge.

There seems to be a widely held misconception that these questions have been written to trick candidates. While there are certainly pitfalls to be avoided, the questions are designed to enable you to develop a very important reading skill: being able to read a text closely and critically, and to tell the difference between what a text tells us and what it doesn't.

So, what does 'Not Given' actually mean? Firstly, it isn't the same thing as just being 'False'. With a false statement, we know that it's wrong, or not true. If a statement is 'Not Given', then we can't tell from reading the text if the statement is true or not. It might be true or false, but the text doesn't say, so we can't be sure.

### Questions 1-5

Do the following statements agree with the information given in [Reading Passage](#)?

In boxes 1-5 on your answer sheet, write:

**YES** if the statement agrees with the writer's claims

**NO** if the statement contradicts the writer's claims

**NOT GIVEN** if there is impossible to say what the writer thinks about this

1. It is more than a thousand years since people started to catch fish for commercial use. ....
2. In general, open access to the oceans is still regarded as desirable. ....
3. Sea fishing is now completely banned in the majority of protected areas. ....
4. People should be encouraged to reduce the number of fish they eat. ....
5. The re-introduction of certain mammals to the Mediterranean is a straightforward task. ....

## Questions 6-8

Choose the correct letter, **A**, **B**, **C** or **D**.

Write your answers in boxes 6-8 on your answer sheet.

6. What does the writer mean with the question, 'How much time have we got?' in the fifth paragraph?

- A. Fisheries policies are currently based on uncertain estimates.
- B. Accurate predictions will allow governments to plan properly.
- C. Fisheries managers should provide clearer information.
- D. Action to protect fish stocks is urgently needed.

7. What is the writer's comment on the Common Fisheries Policy?

- A. Measures that it advocated were hastily implemented.
- B. Officials exaggerated some of its recommendations.
- C. It was based on predictions which were inaccurate.
- D. The policy makers acquired a good reputation.

8. What is the writer's conclusion concerning the decline of marine resources?

- A. The means of avoiding the worst outcomes needs to be prioritised.
- B. Measures already taken to avoid a crisis are probably sufficient.
- C. The situation is now so severe that there is no likely solution.
- D. It is no longer clear which measures would be most effective.

## Questions 9-14

Complete the summary using the list of words/phrases, **A-J**, below.

<b>A</b> action	<b>B</b> controls
<b>C</b> failure	<b>D</b> fish catches
<b>E</b> fish processing	<b>F</b> fishing techniques
<b>G</b> large boats	<b>H</b> marine reserves
<b>I</b> the land	<b>J</b> the past

## Measures to protect the oceans

Up till the twentieth century the world's supply of fish was sufficient for its needs. It was unnecessary to introduce (9)..... of any kind, because large areas of the oceans were inaccessible.

However, as (10)..... improved, this situation changed, and in the middle of the twentieth century, policies were introduced to regulate (11)..... These policies have not succeeded. Today, by comparison with (12)....., the oceans have very little legal protection.

Despite the doubts that many officials have about the concept of (13)....., these should be at the heart of any action taken. The consequences of further (14)..... are very serious and may even affect our continuing existence.

### ĐÁP ÁN:

1. YES	8. A
2. YES	9. B
3. NO	10. F
4. NOT GIVEN	11. D
5. NO	12. I
6. D	13. H
7. C	14. C

## TEST 2

### Section 1

You should spend about 20 minutes on **Questions 1–13**, which are based on Reading Passage 1 below.

#### The Earth

(A) The Earth is the third planet from the Sun and it is the only planet known to have life on it. The Earth formed around 4.5 billion years ago. It is one of four rocky planets on the inside of the Solar System. The other three are Mercury, Venus, and Mars.

(B) The large mass of the Sun makes the Earth move around it, just as the mass of the Earth makes the Moon move around it. The Earth also turns round in space, so different parts face the Sun at different times. The Earth goes around the Sun once (one "year") for every 365¼ times it turns all the way around (one "day").

(C) The Moon goes around the Earth about every 27½ days, and reflects light from the Sun. As the Earth goes round the Sun at the same time, the changing light of the Moon takes about 29½ days to go from dark to bright to dark again. That is where the idea of "month" came from. However, now most months have 30 or 31 days so they fit into one year.

**(D)** The Earth is the only planet in our Solar System that has a large amount of liquid water. About 71% of the surface of the Earth is covered by oceans. Because of this, it is sometimes called the "Blue Planet".

**(E)** Because of its water, the Earth is home to millions of species of plants and animals. The things that live on Earth have changed its surface greatly. For example, early cyanobacteria changed the air and gave it oxygen. The living part of the Earth's surface is called the "biosphere".

**(F)** The Earth is part of the eight planets and many thousands of small bodies that move around the Sun as its Solar System. The Solar System is moving through the Orion Arm of the Milky Way Galaxy now, and will be for about the next 10,000 years.

**(G)** The Earth is generally 150,000,000 kilometers or 93,000,000 miles away from the Sun (this distance is named an "Astronomical Unit"). The Earth moves along its way at an average speed of about 30 km or 19 mi a second. The Earth turns all the way around about  $365\frac{1}{4}$  times in the time it takes for the Earth to go all the way around the Sun. To make up this extra bit of a day every year, an additional day is used every four years. This is named a "leap year".

**(H)** The Moon goes around the Earth at an average distance of 400,000 kilometers (250,000 mi). It is locked to Earth, so that it always has the same half facing the Earth; the other half is called the "dark side of the Moon". It takes about  $27\frac{1}{3}$  days for the Moon to go all the way around the Earth but, because the Earth is moving around the Sun at the same time, it takes about  $29\frac{1}{2}$  days for the Moon to go from dark to bright to dark again. This is where the word "month" came from, even though most months now have 30 or 31 days.

### Questions 1–8

### **SECTION 3**

Read the text below and answer **Questions 29–40**.

### **What to do in a fire?**

Fire drills are a big part of being safe in school: They prepare you for what you need to do in case of a fire. But what if there was a fire where you live? **Would you know what to do?** Talking about fires can be scary because no one likes to think about people getting hurt or their things getting burned. But you can feel less worried if you are prepared.

It's a good idea for families to talk about what they would do to escape a fire. Different families will have different strategies. Some kids live in one-story houses and other kids live in tall buildings. You'll want to talk about escape plans and escape routes, so let's start there.

### **Know Your Way Out**

An escape plan can help every member of a family get out of a burning house. The idea is to get outside **quickly and safely**. Smoke from a fire can make it hard to see where things are, so it's important to learn and remember the different ways out of your home. How many exits are there? How do you get to them from your room? It's a good idea to have your family draw a map of the escape plan.

It's possible one way out could be blocked by fire or smoke, so you'll want to know where other ones are. And if you live in an apartment building, you'll want to know the best way to the stairwell or other emergency exits.

### **Safety Steps**

If you're in a room with the door closed when the fire breaks out, you need to take a few extra steps:

- Check to see if there's heat or smoke coming in the cracks around the door. (You're checking to see if there's fire on the other side.)
- If you see smoke coming under the door — **don't open the door!**
- If you don't see smoke — touch the door. If the door is hot or very warm — **don't open the door!**
- If you don't see smoke — and the door is not hot — then use your fingers to lightly touch the doorknob. **If the doorknob is hot or very warm — don't open the door!**

If the doorknob feels cool, and you can't see any smoke around the door, you can open the door very carefully and slowly. When you open the door, if you feel a burst of heat or smoke pours into the room, quickly shut the door and make sure it is really closed. If there's no smoke or heat when you open the door, **go toward your escape route exit.**

### Questions 29-34
