Action scenes in films

Modern cinema audiences expect to see plenty of thrilling scenes in action films. These scenes, which are (1) _____ as stunts, are usually performed by stuntmen who are specially trained to do dangerous things safely. Everyone can crash a car, but if you are shooting a film, you have to be extremely (2) _____ sometimes stopping right in front of the camera and film crew. At an early stage in the production, an expert stuntman is (3) _____ in to work out the action scenes and form a team. He is the only person who can go against the wishes of the director, although he will usually only do this in the (4) _____ of safety.

Many famous actors like to do the dangerous parts themselves, which produces better shots, since stuntmen don't have to stand in for the actors. Actors like to become (9) _____ in all the important aspects of the character they are playing, but without the recent progress in safety equipment, insurance companies would never let them take the risk. To do their own stunts, actors need to be good athletes, but they must also be sensible and know their limits. If they were to be hurt, the film would come to a sudden halt.

Question 13-17 passage

Right now, the biggest source of energy in the world is fossil fuel. Fossil fuels are oil, gas, and coal. More than 80 percent of the world's energy comes from fossil fuel. There are many problems with fossil fuel. One problem is that when fossil fuel is burned, it pollutes the air. Also, when we take fossil fuel from the Earth, we often cause a lot of damage. Another problem is that

we are running out of it. That is why we need new sources of energy. A big source of energy for many countries is nuclear power. Thirty-one countries use nuclear power. Many ships also use it.

Nuclear power has some advantages. First of all, we can't run out of nuclear power. Nuclear power does not make the air dirty. Also, if a country has nuclear power, it doesn't need to buy as much as oil from other countries.

However, there are also a lot of problems that come with nuclear power. For example, nuclear accidents are very serious. In 1986, there was a nuclear accident in Ukraine. In the next 20 years, about 4,000 people got sick and died. In 2011, there was another very serious nuclear accident in Japan. Japan is still trying to clean up the nuclear waste from the accident.

Many people don't want nuclear power in their countries. They say that it is not safe. A lot of people want their countries to use safer and cleaner ways to get electricity. There have been protests against nuclear energy in the United States, Russia, France, Taiwan, Japan, India, and many other countries. Although many people hate nuclear energy, more and more countries are using it. One reason for this is that the world is using more and more energy. We just don't have enough fossil fuel. However, if we use nuclear power, then we may have more serious problems in the future.
